1. The Gilberths focused on motion study and work simplification.

Key - contributions.

a. Motion study : Analyzed worker movements to eliminate unnecessary motions and improve efficiency.

b. Therbligs : classified basic human motions (17 elements like search, find, hold etc.) to study work scientifically.

c. work simplification : Designed better tools, workplace layout, and methods to reduce fatigue and increase productivity.

2. organising is critical because :

a. Defines roles and responsibilities : clarifies who does what, avoiding confusion and duplication.

b. Ensures efficient use of resources : proper grouping of tasks and allocation of resources improves efficiency

c. Facilitates coordination and control : Establishes authority - responsibility relationship and smooth workflow.

3) • Reduces cost by preventing overstocking, wastage and storage losses.

• Improves working capital management by maintaining optimum stock levels.

5.

Basis	wages	Incentives
Meaning	fixed payment for work done	extra payment for better performance
Nature	Regular and guaranteed	variable and performance based
purpose	To compensate for work	To ~~motivate~~ motivate higher productivity.

4. • Ensure availability of materials for production and customer delivery.

• minimise inventory levels and reduce carrying costs.

• plan production and purchasing schedules efficiency.
