1) a) • HRM refers to managing people in an organisation to achieve business goal efficiency

• Objectives include: effective utilization of employees, improving employee skills, maintain good relationship.

· Employee development
· organizational growth
· Employee satisfaction and motivation

b) Steps in recruitment process:-

1. Identify job vacancy
2. Advertising job
3. Receiving application
• Screen application

3) a) FC = 1,50,000

VC = 20

SP = 50

$$BEP = \frac{FC}{SP - VC} = \frac{150000}{50-20} = 5000 \text{ units}$$

Break even point is 5000 units.

4) a) method for calculate overhead cost:

• Percentage of Direct material cost :-

$$\text{overhead rate} = \frac{\text{Overhead cost}}{\text{Direct material cost}} \times 100$$

- Percentage of direct labour cost:-

$$\text{Overhead rate} = \frac{\text{overhead cost}}{\text{direct labour cost}} \times 100$$

- Prime cost method:-

$$\text{overhead rate} = \frac{\text{overhead cost}}{\text{prime cost}} \times 100$$

- Labour hour rate method:-

$$\text{overhead rate} = \frac{\text{Total overhead}}{\text{total labour hours}}$$

b) Eligibility criteria for patent:-

- Novelity
- Inventive step
- Industrial applicamy
- Patent subject matter

- Procedure:-

- Patent search
- Preparation of application
- filling the application
- Publication of application
- Request for examination
- Examination by patent office
- Grant of patent.
